Larry, sounds like you are prematurely old, what with the possibility of arthritis, suffering the effects of disappation, etc. But as long as the test show nothing, at least you to date have nothing but whatever is troubling you to worry about. Joking aside, hope they find whatever the cause is. Your 2/7 came today. Is the Adams in the liquor-board scandal mentioned hy Rife? The name spunds familiar. The Romero AP story is the only US wire copy of which I know. If you can thing of who spoke to you about it and what was said, I'd like to know. This may be another "Farewell America", with the benefit of the knowledge gained by the mistakes with it. There will be major U.S. publication and it has to be a fake. I presume intelligence benefits from it and interest in it. Frame-Up: are you sure it was only "several weeks ago" that you saw it advertised in the Times? Last time of which I know was November, and that is more weeks ago than "several". I don't have a single copy yet. Or any explanation. Don't bother to copy Crazy Sherman's letter to CJR, 2/73. I have a copy, thanks. By the way, the literary agency handling the Romero book in the US is Scott Meredith, if they have a previous record with the dubious. They are big. Back to Adams: if he figures with Rife and helped the mob, it gets lots more interesting, doesn't it? Best to your arthritis, your prostate, your disappations-you! HW 2/12/73
